

Other ways to encourage breast cancer awareness at your company during the month of October:

- Create computer screen savers featuring a breast cancer awareness theme, which encourages screening and inspirational photos of associates touched by breast cancer.
- Providing promotional items featuring nurse line phone numbers and reminders to get mammograms at any events your company is sponsoring this month.
- Put up flyers encouraging women to get regular mammograms.
- Promote a theme in the cafeteria and offer healthy meals and foods that can help prevent diseases like breast cancer.
